Agenda

1 Trendy na trhu

2 Stávající a nová nabídka průmyslových počítačů

3 Uvedení na trh

4 Podpora prodeje a dokumentace

5 Příklady aplikací

6

7

Trendy na trhu

Trendy na trhu

Rostoucí **poptávka po výpočetním výkonu** na strojích

- Analytika a sběr dat
- Pokročilé a výkonné grafické uživatelské rozhraní pro provoz stroje

Rostoucí **využití tenkých klientů** v architekturách klient-server

- Snižuje bezpečnostní rizika na úrovni závodu a centralizuje správu software
- Zvyšuje životnost a snižuje náklady na údržbu

Zvyšují se požadavky **specifické pro daná odvětví**

- Specifické požadavky na funkce a **certifikace**
- **Zakázkově konfigurovatelné** produkty podle požadavků konkrétní aplikace

ASEM

V dubnu 2020 společnost Rockwell Automation získala italský ASEM, S.p.A., předního výrobce průmyslových počítačů a technologií digitální automatizace

Přínos ASEM

Inovace, Kvalita, Flexibilita, Kontinuita

- **Škálovatelná** nabídka průmyslových počítačů
- Založeno **na otevřených a standardních technologiích**
- **Přímá kontrola a řízení** vývoje hardwaru, softwaru i výroby
- **30%** lidských zdrojů je věnováno **výzkumu a vývoji**
- ISO certifikace

VAŠE VÝHODA

spolehlivý a flexibilní dodavatel hardwaru pro vaše IIoT řešení

- s prvotřídním vývojovým centrem pro průmyslové počítače
- s flexibilním a nákladově efektivním výrobním prostředím

VersaView 6300B Box PC and 6300T Box Thin Client

Features and Benefits

Intel Atom Class Box PC and Thin Client

- Intel Apollo Lake Atom processor
- Available with Microsoft® Windows 10 IoT Enterprise 2019 LTSC
- DisplayPort supports up to 4K high resolution
- 2 x Ethernet and 2 x USB 3.0 (Type A) ports
- M.2 SSD up to 256 GB (PC Only)
- 4 GB or 8 GB DDR4 RAM
- Fanless, book mount construction, 24V DC
- 0 to 50°C operating temperature
- ThinManager ready option

Intel Core i Class Box PCs

- Core™ i3 and i7 dual and quad core 7th generation 64 bit processors
- Available with Microsoft Windows 10 IoT Enterprise 2019 LTSC
- No OS version supports Linux
- 4 x Ethernet, 3 x USB 3.0 (Type A), 2 x USB 2.0 (Type A), 1 x RS-232 (DB9M), 1 x DVI-D
- M.2/mSATA and 2.5" SSD up to 1 TB SATA III SSD
- Up to 32 GB DDR4 SODIMM modules
- Up to 3 PCIe expansion slots
- Fanless design with book mount, wall mount or DIN rail construction, 24V DC
- Fan cooled unit with wall or DIN rail construction, 100V/230V AC
- Up to +50°C operating temperature (0°C to +45°C for i7 processors)
- ThinManager Compatible Plus

Allen-Bradley® VersaView® 6300B Box PCs are available in multiple form factors and processors to match your application. Book mounting units have a fanless design making them optimal for applications requiring low maintenance. The most compact units in this family feature Apollo Lake Atom processors, making them ideal for human machine interface (HMI), IIoT gateway and data logging applications. Atom class units are also available as ThinManager® ready thin clients and are not equipped with an operating system or solid-state drive (SSD).

Slightly larger book mount units feature a choice of Core i3 and i7 processors for mid-size applications.

Wall mount units with Core i3 and i7 processors are available in designs with fans or without. Fan-cooled units perform well in challenging environments with elevated temperatures. These PCs may be paired with FactoryTalk® View SE software to provide the optimal HMI interface experience within the Rockwell Automation® Connected Enterprise.

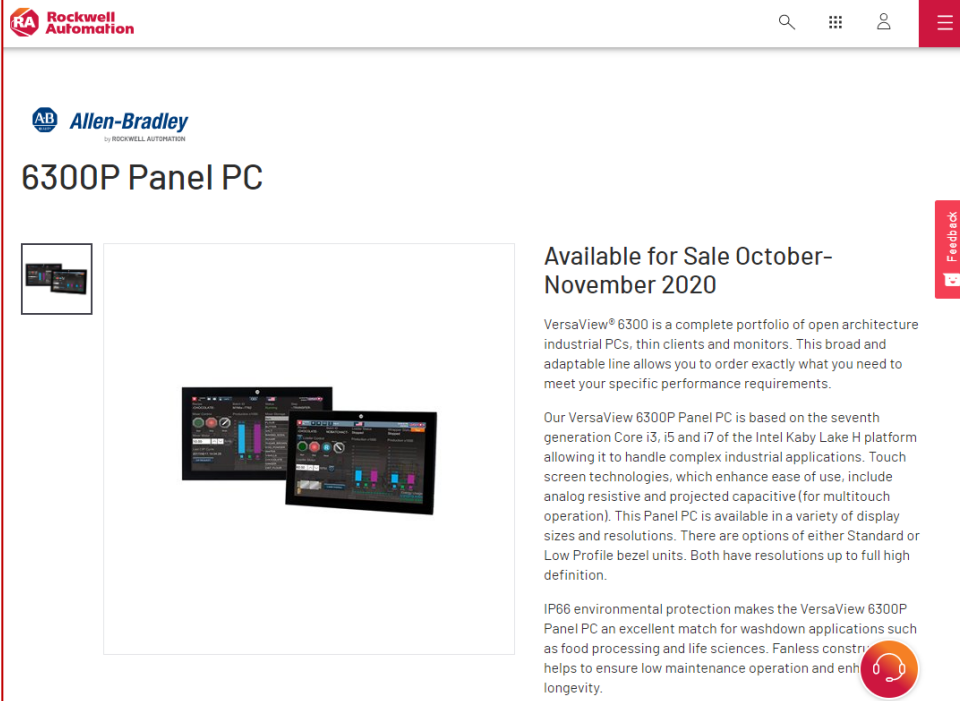

All PCs come standard with the Microsoft Windows 10 IoT Enterprise operating system. Units with an i Class processor are optionally available without an operating system.

Robust mass storage is supplied by a M.2 SSD and has RAM permanently soldered to the motherboard to help prevent issues from shock and vibration.

Atom class book-mount and wall-mount units are also DIN rail mountable.

Preview of upcoming release on public website

The screenshot shows the Rockwell Automation website for the 6300P Panel PC. The page features the Allen-Bradley logo, the product name "6300P Panel PC", and a release date of "Available for Sale October-November 2020". The main content area includes an image of the panel PC displaying a control interface. To the right, there is a "Feedback" button and a circular icon with a speech bubble.

Příklady aplikací

VersaView 6300 & FactoryTalk Edge Gateway

Integration of OT-data and IT-systems has never been easier!

With FactoryTalk Edge Gateway you can create information models at OT level and map these to applications at IT level.

- Simplifies and automates data collection
- Enables IT / OT convergence
- **Data Destinations**
 - Thingworx
 - SQL Server
 - Azure IoT Hub
- **Data Sources**
 - FactoryTalk Smart Object
 - FT Linx
 - OPC-DA (KEPServer, third party)

VersaView 6300 In-Cabinet Book Mount Box PC

VersaView 6300 Intel Atom Class Book Mount Box PC is a very compact industrial computer for DIN rail or wall mount. The fact that it is manufactured by a global player that also provides support worldwide makes it even a better choice for customer's

FactoryTalk Edge Gateway software automatically discovers high-speed, contextualized OT data from controllers and packages it in a logical, common information model that control engineers can configure. This common information model speeds setup for similar assembly lines and can be enriched with third-party data. It can be mapped to on-prem or cloud applications and easily consumed to accelerate IT/OT convergence. FactoryTalk Smart Object content is created by control system designers, and they extend base Logix tags with additional, user-definable, configuration properties. Think of them as metadata that identify specific data points, like energy consumption, asset health, etc. When you configure these properties, you reference operational parameters to tell the software how to collect data with relevance to unique outputs.

VersaView 6300 industrial computers are designed to be much more durable and have higher reliability compared to office grade computers. When it comes to computers in a production facility, it is downtime and maintenance that causes high computer costs. VersaView 6300 computers is designed to withstand harsh industrial environments and will therefore cause fewer problems during its lifetime in comparison with an office grade computer which is more sensitive to temperature fluctuations, moisture and shock / vibrations.

- 1.6 GHz Apollo Lake x7-E3950
- 4 GB or 8 GB RAM
- 2 x Ethernet (10, 100, 1000 Mbps)
- 2 x USB 3.0
- 1 x DisplayPort 4K
- 0-50°C, 24 VDC
- Windows 10 IoT Enterprise 2019
- DIN & Wall mount

VersaView 6300 benefits

- Extremely compact
- High quality
- Robust Fanless design
- Worldwide support
- Competitive price
- Fast delivery from stock

VersaView 6300 & FactoryTalk Linx OPC UA Gateway

Accessing and transporting data is easier than ever before!

With FactoryTalk Linx Gateway you can deliver data from Logix and other Allen Bradley PLC to 3rd party software.

- Connect third-party software using OPC UA and OPC DA.
- Communicates with full range of Allen-Bradley Logix 5000™, PLC-5®, SLC™ 500 and Micro800™ controllers
- Direct communication to Logix5000™ tag-based alarm
- ControlLogix® redundancy support
- Redundant controller shortcuts

VersaView 6300 In-Cabinet Book Mount Box PC

VersaView 6300 Intel Atom Class Book Mount Box PC is a very compact industrial computer for DIN rail or wall mount. The fact that it is manufactured by a global player that also provides support worldwide makes it even a better choice for customer's

FactoryTalk Linx Gateway is an OPC DA and OPC UA Server interface for FactoryTalk Linx to deliver information collected from Logix5000™ and other Allen-Bradley® controllers to external OPC clients, permitting third-party software to coexist with FactoryTalk® software. FactoryTalk Linx Gateway also enables 3rd party software to share data with FactoryTalk View SE software (FactoryTalk Live Data). FactoryTalk Linx Gateway are based on how many tags are being served, and whether or not the data source that connects to the PLC is on the same computer or located on one or more remote computers.

VersaView 6300 industrial computers are designed to be much more durable and have higher reliability compared to office grade computers. VersaView 6300 & FactoryTalk Network Manager

Get a better view into your Network!

FactoryTalk Network Manager is an easy-to-use, intuitive network management tool for efficient operation and maintenance of Industrial Automation Networks.

- Generates an overall topology and a device-centric view of plant floor assets
- Discovers both network and end devices including devices across a controller backplane
- Network health and monitoring
- Easier deployment, commissioning and maintenance of the network

VersaView 6300 In-Cabinet Wall Mount Box PC

VersaView 6300 Intel i7 Wall Mount Box PC is a powerful industrial computer for wall mount. The fact that it is manufactured by a global player that also provides support worldwide makes it even a better choice for customer's

- Intel Core i7-7820EQ, Quad Core, 3.00 GHz
- 16 GB DDR4 RAM, 256 GB SSD
- 4x Ethernet (10, 100, 1000 Mbps)
- 3 x USB 3.0 and 2 x USB 2.0
- 1 x DVI-D, 1 x RS232, 1 x PCIe x4
- 0-45°C, 24 VDC
- Windows 10 IoT Enterprise 2019
- Wall mount

VersaView 6300 benefits

- High quality
- Robust Fanless design
- Worldwide support
- Competitive price
- Fast delivery from stock

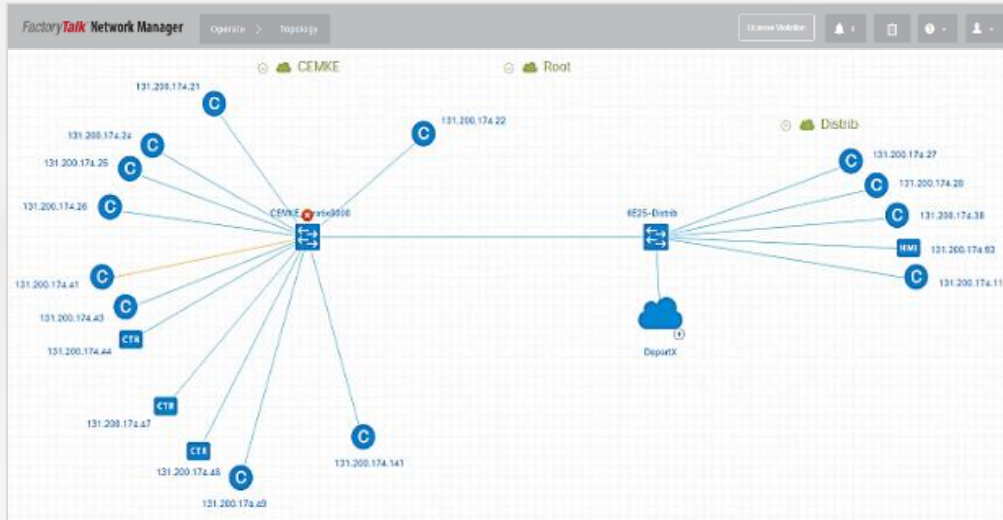

FactoryTalk Network Manager software helps to achieve increased network visibility, real-time troubleshooting, and simplified configuration and maintenance. Get insight into the performance of your network operations by getting a closer look into your devices connected in your manufacturing environment. Discovery of plant floor assets with multiple management protocols:

- CIP Protocol (EtherNet/IP) • SNMP • Modbus • BACnet • NetBIOS™ • PROFINET • OPC UA

VersaView 6300 industrial computers are designed to be much more durable and have higher reliability compared to office grade computers. When it comes to computers in a production facility, it is downtime and maintenance that causes high computer costs. VersaView 6300 computers is designed to withstand harsh industrial environments and will therefore cause fewer problems during its lifetime in comparison with an office grade computer which is more sensitive to temperature fluctuations, moisture and shocks / vibrations.

VersaView 6300 Panel-PC

VersaView 6300 Intel i7 Panel-PC is a powerful industrial computer for panel mount. The fact that it is manufactured by a global player that also provides support worldwide makes it even a better choice for customer's

- 15.6" Aluminum and Glass True Flat Multi-Touch (16:9)
- Intel Core i7-7820EQ, Quad Core, 3.00 GHz
- 16 GB DDR4 RAM, 256 GB SSD
- 4x Ethernet (10, 100, 1000 Mbps)
- 3 x USB 3.0 and 2 x USB 2.0 (both rear)
- 1 x DVI-D, 1 x RS232, 1 x PCIe x4
- 0-45°C, 24 VDC
- Windows 10 IoT Enterprise 2019
- Panel mount

VersaView 6300 benefits

VersaView 6300 & Logix and View Development

Engineering workstation for Logix controllers and FactoryTalk View HMI

Studio 5000 Logix Designer and FactoryTalk Enterprise Studio software are the tools you need when developing and maintaining both Logix and FactoryTalk View HMI applications

Logix Designer

- One programming software for all disciplines - safety, motion, drives, process and discrete

View Enterprise Studio

- One configuration software for all HMI applications – local operator panels, station HMI and distributed HMI/SCADA

VersaView 6300 In-Cabinet Wall Mount Box PC

VersaView 6300 Intel i7 Wall Mount Box PC is a powerful industrial computer for wall mount. The fact that it is manufactured by a global player that also provides support worldwide makes it even a better choice for customer's

- Intel Core i7-7820EQ, Quad Core, 3.00 GHz
- 16 GB DDR4 RAM, 256 GB SSD
- 4x Ethernet (10, 100, 1000 Mbps)
- 3 x USB 3.0 and 2 x USB 2.0
- 1 x DVI-D Single Link (max resolution: 1920x1080 Full HD)
- 0-45°C, 24 VDC
- Windows 10 IoT Enterprise 2019
- Wall mount

VersaView 6300 benefits

- High quality
- Robust Fanless design
- Worldwide support
- Competitive price
- Fast delivery from stock

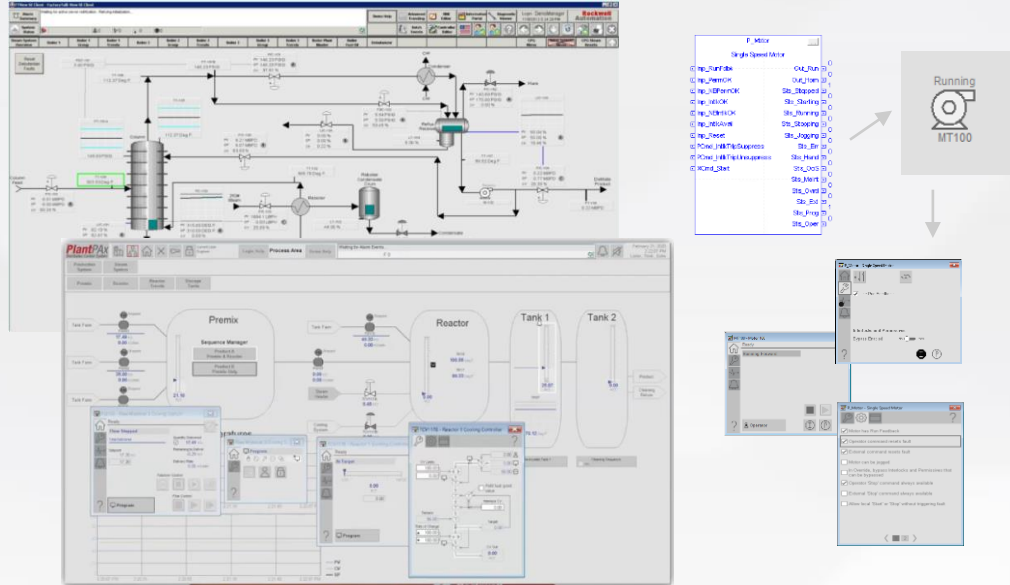

Studio 5000 Logix Designer is the one application to configure, program and maintain the entire Allen-Bradley® Logix 5000™ family of controller products and related devices.

FactoryTalk View Studio is the design-time environment for FactoryTalk View that provides the editors and tools you need to develop and test network distributed, network station, and local station human-machine interface (HMI) applications. It contains editors for creating complete applications and contains client and server software for testing the applications you create.

VersaView 6300 industrial computers are designed to be much more durable and have higher reliability compared to office grade computers. When it comes to computers in a production facility, it is downtime and maintenance that causes high computer costs. VersaView 6300 computers is designed to withstand harsh industrial environments and will therefore cause fewer problems during its lifetime in comparison with an office grade computer which is more sensitive to temperature fluctuations, moisture and shocks / vibrations.

VersaView 6300 & FactoryTalk View SE Station

Advanced Operator workstation for single machine or line-level monitoring !

FactoryTalk View SE Station is a modern HMI software that provides an accurate real-time view of operations, while meeting the demands from operators, maintenance and engineering.

Premier Logix integration

- Referencing Logix controller tags directly from HMI
- Support for Logix controller-based alarms, both Instruction and Tag based
- The Library of Process Objects is a predefined library of controller code (AOIs) and HMI graphics.

VersaView 6300 Panel-PC

VersaView 6300 Intel i7 Panel-PC is a powerful industrial computer for panel mount. The fact that it is manufactured by a global player that also provides support worldwide makes it even a better choice for customer's

- 15.6" Aluminum and Glass True Flat Multi-Touch (16:9)
- Intel Core i7-7820EQ, Quad Core, 3.00 GHz
- 16 GB DDR4 RAM, 256 GB SSD
- 4x Ethernet (10, 100, 1000 Mbps)
- 3 x USB 3.0 and 2 x USB 2.0 (both rear)
- 1 x DVI-D, 1 x RS232, 1 x PCIe x4
- 0-45°C, 24 VDC
- Windows 10 IoT Enterprise 2019
- Panel mount

VersaView 6300 benefits

- High quality
- Robust Fanless design
- Worldwide support
- Competitive price
- Fast delivery from stock

FactoryTalk View SE (Site Edition) Station software is a local stand-alone HMI system with premier integration to Logix controllers. Ideally suited for single machine or line-level monitoring, control and data acquisition. FactoryTalk View SE Station can be extended with FactoryTalk ViewPoint that provides for a fully scalable, fully animated, read-and write view of the existing application from a web browser. FactoryTalk View SE Station is configured with FactoryTalk View Studio Enterprise: One configuration software for all HMI applications – local operator panels, station HMI and distributed HMI/SCADA.

VersaView 6300 industrial computers are designed to be much more durable and have higher reliability compared to office grade computers. When it comes to computers in a production facility, it is downtime and maintenance that causes high computer costs. VersaView 6300 computers is designed to withstand harsh industrial environments and will therefore cause fewer problems during its lifetime in comparison with an office grade computer which is more sensitive to temperature fluctuations, moisture and shocks / vibrations.

Závěr

Nová řada VersaView 6300 je vaší ideální hardwarovou platformou pro IIoT a HMI

- **Škálovatelná** nabídka průmyslových počítačů
- Založeno **na otevřených a standardních technologiích**
- **Přímá kontrola a řízení** vývoje hardwaru, softwaru i výroby
- **30%** lidských zdrojů je věnováno **výzkumu a vývoji**
- ISO certifikace
